A hand washing facility shall include an insulated container with a spigot that can be turned on to allow potable, clean warm water to flow; a wastewater container; soap; disposable towels; and a waste receptacle. Hand washing facilities are not required if the only food items offered are commercially prepackaged foods dispensed in their original containers. When handling ready-to-eat foods, employee shall utilize suitable utensils, gloves or a chemical hand sanitizer as barrier.

**TEMPERATURES** - The internal temperature of cold foods must be 41°F or below and hot foods 135° F or above. A metal stem thermometer shall be provided to check temperatures of hot and cold foods. Reheating for hot holding shall be done rapidly to 165°F and the time the food is between the temperatures may not exceed four hours.

**ICE** - Ice that is consumed or that contacts food shall have been made under conditions meeting the requirements of the rules. The ice shall be obtained only in chipped, crushed or cubed form and in single-use safe plastic or wet-strength paper bags filled and sealed at the point of manufacture. The ice shall be held in these bags until it is dispensed in a way that protects it from contamination.

**WAREWASHING** - Three clean containers with lids may be used, as alternative manual ware washing equipment - equivalent to a three-compartment sink. Food contact surfaces of all equipment and utensils shall be washing, rinsing, and sanitizing. Liquid bleach shall be provided for sanitizing equipment and utensils. A test kit that measures the concentration in mg/L of sanitizing solution is required.

**CLEANING** – Equipment shall be cleaned in a way that prevents food contamination and the general area shall be kept clean at all times. **SINGLE-SERVICE ARTICLES** - Only single-service tableware shall be provided to the consumer.

**WATER** – Water from an approved source shall be made available in a temporary food establishment for food preparation, hand washing, and for cleaning and sanitizing utensils and equipment. Water from an approved source includes: commercially bottled drinking water, closed portable water containers, enclosed vehicular water tank, on-premise water storage tanks, or piping, tubing or hoses connected to an approved source.

**STORAGE** - Single-service items, food equipment and utensils shall be stored at least six inches above the

flooring.<sup>[1]</sup><sub>SEP</sub>

**WET STORAGE** - Packaged food may not be stored in direct contact with ice or water if the food is subject to the entry of water because of the nature of its packaging, wrapping, or container or its positioning in the ice or water.

**SEWAGE** - A large, covered container shall be provided to store wastewater until final disposal. All wastewater and sewage generated from the establishment shall be disposed of through an approved sanitary sewage system that is constructed, maintained and operated according to law.

**STANDS OR BOOTHS** - Booths or stands shall be constructed in such a manner as to prevent entrance of flies, dust dirt and other foreign matter. All stands or booths shall be enclosed and covered with wood, canvas or other materials that protect the interior of the establishment from the weather and shall include shelves or other facilities to keep all food and supplies off the floor.
